ADVANCED TECHNOLOGIES AND THEIR APPLICATIONS
ISBN: 978-1-77188-380-1. CAT#: N11665

Covers emerging technologies, energy applications and challenges.

Editors: Megh R. Goyal and Rupesh S. Chavan
Provides a comprehensive perspective of present, past, and future process engineering research, innovation, and emerging trends.

SOIL AND WATER ENGINEERING: PRINCIPLES AND APPLICATIONS OF DESIGN
ISBN: 978-1-77188-360-4. CAT#: N11666

Covers soil and water engineering principles and applications, addressing the design and modeling of water resources systems, soil-structure interaction, and hydraulic and sedimentation processes.

Editors: Baburam Parajuli and Megh R. Goyal
Addresses model selection and calibration, sediment transport in natural channels, and stormwater management in the urban environment.

FLood ASSEssMENT
ISBN: 978-1-77188-405-4. CAT#: N11667

Covers flood assessment modeling, parameterization, and flood risk management.

Editors: Eric A. Warner and Megh R. Goyal
Focuses on recent advances in flood assessment modeling, including riverine and coastal flooding.

FOOD TECHNOLOGY
ISBN: 978-1-77188-369-5. CAT#: N11668

Covers applications and technologies in food processing.

Editors: Megh R. Goyal and Rupesh S. Chavan
Focuses on new emerging trends, applications and challenges.

TECHNOLOGICAL INTERVENTIONS IN FALLOW AND VEGETABLES

Covers technological interventions in the management of irrigated vegetables.

Editors: Khursheed A. Khan, Megh R. Goyal, and Prasad R. C. Divakar
Focuses on new and different techniques used for the processing of fruits and vegetables, including methods to extend shelf life and improve safety.

SUSTAINABLE BIOGAS
ISBN: 978-1-77188-587-4. CAT#: N11937

Covers recent advances in the production and application of biogas.

Editors: Khursheed A. Khan, Megh R. Goyal, and Prasad R. C. Divakar
Covers biogas production in India and its potential for use in small-scale power generation.

FOOD PROCESS ENGINEERING: EMERGING TRENDS IN RESEARCH AND THEIR APPLICATIONS

Covers the latest research and applications in food processing.

Editors: Bhaskar Mohapatra and Megh R. Goyal
Provides an overview of the latest research and applications in emerging technologies in food processing.

EMERGING TECHNOLOGIES IN AGRICULTURAL ENGINEERING

Covers recent advances in agricultural engineering and technology.

Editors: Megh R. Goyal and Rupesh S. Chavan
Addresses emerging technologies, energy management, and water conservation in agricultural crops under micro environments.

EMERGING TRENDS IN RESEARCH AND THEIR APPLICATIONS

Covers the latest research and applications in food processing.

Editors: Bhaskar Mohapatra and Megh R. Goyal
Provides an overview of the latest research and applications in emerging technologies in food processing.

EMERGING TRENDS IN RESEARCH AND THEIR APPLICATIONS

Covers the latest research and applications in food processing.

Editors: Bhaskar Mohapatra and Megh R. Goyal
Provides an overview of the latest research and applications in emerging technologies in food processing.
